NINTEX PROCESS MANAGER

SERVICES

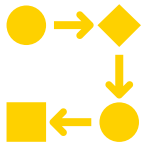

OVERVIEW

Nintex Process Manager is a cloud based visual process mapping software for creating and storing business processes. It's easy to use and allows organisations to decentralise process management whilst maintaining good governance.

BENEFITS

- ✓ Turn complex process maps, documents and visio charts into simplified process maps
- ✓ Becomes central depository for your business processes
- ✓ Improves coordination and alignment between teams
- ✓ Empowers teams by assigning ownership and accountability

HOW THRIVE35 CAN HELP

Business Process Mapping

Includes:

- ▶ Capture 'as-is' processes
- ▶ Collect and review documents
- ▶ Processes set up in Process Manager
- ▶ Systems identified and flagged
- ▶ Future improvement and automation opportunities identified and tagged

Develop Business Process Management Frameworks and Governance

Includes:

- ▶ Charter document
- ▶ Process management framework
- ▶ Rulebook
- ▶ Roadmap for implementation
- ▶ Improvement Plan
